1. INTRODUCTION

1.1 Purpose

The purpose of this Software Requirement Specification (SRS) is to define the requirements for Transaction posting in DoP Enterprise accounting module. The system shall account, reconcile and post the financial transactions data i.e receipts and payments, maintain accurate records, automate financial reporting, and provide tools for analysis. This will replace a manual or fragmented accounting process to increase efficiency, accuracy, and compliance.

1.2 Scope

In scope:

1. Accounting, Reconciling and Posting of the figures of Receipts and Payments as reported by the IMS system in accordance with the figures reported by the Receipt/Payment Bank Accounts.
2. Generating various financial reports including collection reports, investible amount report, claims paid reports, incentive paid report, GST reports, TDS report at various levels of hierarchy of the offices operating IMS.
3. Ensuring compliance and maintaining an audit trail for transactions while accounting and posting of the figures.

Out of scope:

1. Functions beyond core accounting activities and functions not specifically mentioned in this SRS document.

1.3 Intended audience

This document is intended for project managers, software developers, quality assurance (QA) testers, system administrators, business analysts, and financial stakeholders.

2. OVERALL DESCRIPTION

2.1 User roles and characteristics

1. **Maker** : Responsible for initiating receipt and payment transactions through IMS interface at collection/payment avenues.

2. **Approver** : Competent authority responsible for approving and authorizing payments through IMS interface at collection/payment avenues and approving modifications done by system administrator.

3. **Accountant** : Monitors and manages ledger and perform reconciliations and make manual entries to the ledger if required in specific cases.

4. **Auditor** : Requires read-only access to transaction records and audit trails to verify financial accuracy and compliance.

5. **System Administrator** : Responsible for system configuration, maintenance, and security. They can modify user accounts, access permissions, chart of accounts (approved by competent authority), mapping of ledger accounts and other technical aspects of the system.

2.2 Functional requirements

2.2.1 General Ledger (GL) management

1. **REQ-GL-1.0:** The system shall allow System Administrators to set up and customize the chart of accounts (approved by competent authority) and mapping of ledger accounts as per standard accounting procedures as and when approved by the competent authority for implementation.

2. **REQ-GL-1.1:** The system shall automatically account and post transaction data including IMS receipts and payment through double-entry bookkeeping to the appropriate ledger accounts (IT 2.0 Account Codes.)

3. **REQ-GL-1.2:** The system shall allow users to post accounting entries in ledger accounts manually in specific cases, with an optional workflow for review and approval.

2.2.2 Banking and reconciliation

1. **REQ-BANK-2.0:** The system shall initiate automatic payments to customer's/agent's bank accounts for incentives, loan and maturity values in accordance with the approved procedures deployed in IMS and as approved by the competent authority.

2. **REQ-BANK-2.1:** The system shall manage remittance and drawing bank accounts of respective DDOs and reconcile bank statements with recorded transactions automatically.

3. **REQ-BANK-2.2:** The system shall provide a workflow to reconcile bank statements with recorded transactions manually in specific cases.

2.2.3 Financial reporting

1. **REQ-REP-3.0:** The system shall generate standard financial statements as and when required, including:
   I. Detailed and Consolidated Receipt reports with requisite bifurcations.
   II. Detailed and Consolidated Payment reports with requisite bifurcations.
   III. Detailed and Consolidated GST and Tax Reports
   IV. Detailed and Consolidated Investible Funds Reports

2. **REQ-REP-3.1:** The system shall allow users to export reports in common formats such as CSV, PDF, and Excel.

3. **REQ-REP-3.2:** The system shall consist of drill-down functionality from summary reports to underlying transaction details.

2.3 Non-functional requirements

1. **Performance (NFR-PERF-1.0):** The system shall process financial transactions within 2 seconds, and generate standard financial reports within 10 seconds for standard data volumes.

2. **Security (NFR-SEC-2.0):** The system shall protect all financial data using encryption both in transit and at rest. It must use role-based access control to restrict data

access based on user permissions. User authentication must support strong passwords and two-factor authentication (2FA).

3. **Reliability (NFR-REL-3.0):** The system must operate with 99.9% uptime, excluding planned maintenance. A robust backup and recovery system shall be in place to prevent data loss in the event of a system failure.

4. **Usability (NFR-USABILITY-4.0):** The user interface must be intuitive, with a clear and consistent navigation design that requires minimal training for typical accounting tasks.

5. **Scalability (NFR-SCALE-5.0):** The system architecture shall be scalable to accommodate an increase in transaction volume and the number of users as the transaction volume grows.

2.4 External interface requirements

1. **User interfaces:** The system shall provide a web-based user interface accessible via standard browsers on desktop and mobile devices.

2. **Software interfaces:** The system shall provide APIs to integrate with third-party software, such as banking portals, payment gateways, and management systems.

3. **Communication interfaces:** The system shall be capable of sending automated email notifications for financial activities, such as receipts, payments and requests.

3. PROCESS DESCRIPTION & FLOW CHARTS

3.1 REQ-GL-1.0

Function 1 : Modification of Charts of Accounts

Sub Function 1.1 :

Description : Addition of Ledger Accounts in Chart of Accounts.

User : System Administrator, Approver

Sub Function 1.2 :

Description : Deletion of Ledger Accounts in Chart of Accounts.

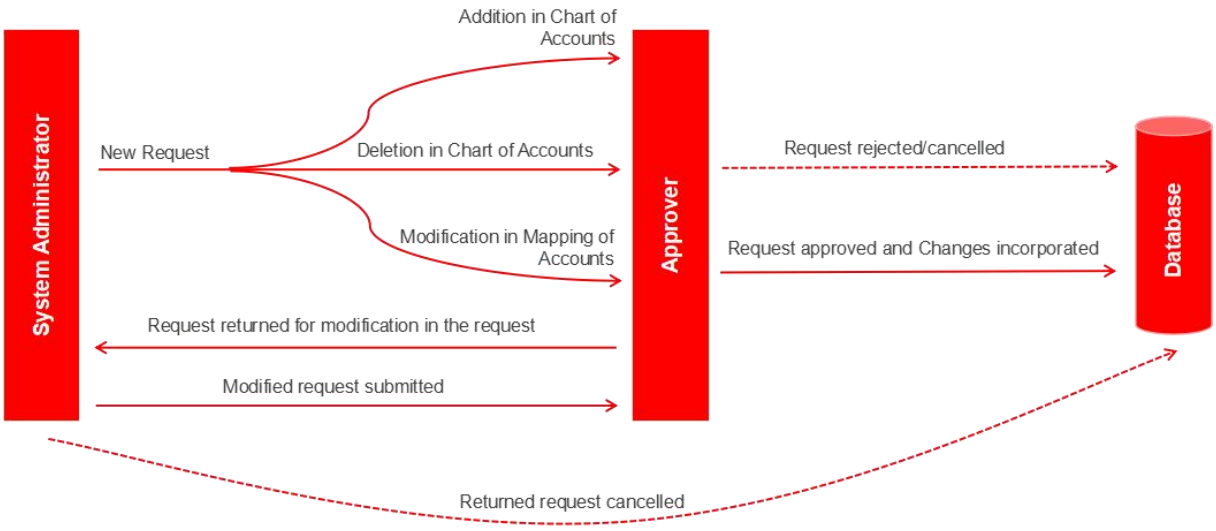
User : System Administrator, Approver

Function 2 : Mapping of Ledger Accounts

Sub Function 2.1 :

Description : Modification in mapping of Ledger Accounts.

User : System Administrator, Approver



REQ-GL-1.0

3.2 REQ-GL-1.1

Prerequisite

1. Refer "Codes/Notations for Amount" table attached as Annexure
2. Refer "Account Codes Description" table attached as Annexure
3. Refer "General Abbreviations" table attached as Annexure
4. If the source of receipt is CBS SI, the RTB shall be replaced by PCC.

Function 3 : Accounting & Posting of Receipts

Sub Function 3.1 : New Policy Premium Receipts

Step 1 : Premium payment received for new policy - Policy Indexed

Description : A_P received from customer ;

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_P	If PT = PLI	PIA	A_P		RTB
A_P	If PT = RPLI	RIA			

If policy is not approved jump to Function 4, Sub Function 4.7

If policy is approved execute Function 4, Sub Function 4.3 and continue.

Step 2 : Policy approved and Amount accounted (Free Look up period started)

Description : A_P received from customer ;

$A_P = P_F + A_A + C_{PF} + S_{PF} - R$

1. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.
2. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
P_F	If PT = PLI	PFP(PDT)	A_P	If PT = PLI	PIA_C

C_{PF}		PFCGST	R		PR
S_{PF}		PFSGST	A_P	If PT = RPLI	RIA_C
A_A		SSH	R		RR
P_F	If PT = RPLI	RFP(PDT)			
C_{PF}		RFCGST			
S_{PF}		RFSGST			
A_A		SSH			

If policy is cancelled by the customer within free look up period jump to Function 4, Sub-Function 4.7

If policy is not cancelled continue.

Step 3 : Free look-up period ended.

Description :

Execute Function 4, Sub-Function 4.4 and Terminates.

Sub Function 3.2 : Subsequent Premium Receipts

Step 1 : Premium payment received from customer - Subsequent to Intial Payment

Description :

1. A_P is received from customer and A_A from previous payments, if any is included to arrive at the Net payment amount against the concerned policy;

$A_P + A_A$ (Previous) = $P_F + P_R + C_{PF} + S_{PF} + C_{PR} + S_{PR} + D + C_{DF} + S_{DF} - R$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.

3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			**Payment Side**		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
P_F	If PT = PLI	PFP(PDT)	A_P	If PT = PLI	RTB
P_R		PRP(PDT)	A_A		SSH_C
C_{PF}		PFCGST	R		PR
S_{PF}		PFSGST			
C_{PR}		PRCGST			
S_{PR}		PRSGST			
D		PDF			

C_{DF}		PRCGST			
S_{DF}		PRSGST			
P_F	If PT = RPLI	RFP(PDT)	A_P	If PT = RPLI	RTB
P_R		RRP(PDT)	A_A		SH
C_{PF}		RFCGST	R		RR
S_{PF}		RFSGST			
C_{PR}		RRCGST			
S_{PR}		RRSGST			
D		RDF			
C_{DF}		RRCGST			
S_{DF}		RRSGST			

Execute Function 4, Sub-Function 4.4 and Terminates.

Sub Function 3.3 : Loan Repayment Receipts

Step 1 : Loan repayment received from customer

Description :

1. A_P is received from customer ;

$A_P = L_P + L_I$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.

3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			**Payment Side**		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
L_P	If PT = PLI	PLP(PDT)	A_P		RTB
L_I		PLI(PDT)			
L_P	If PT = RPLI	RLP(PDT)			
L_I		RLI(PDT)			

Function Terminates.

Sub Function 3.4 : Revival Receipts

Step 1 : Revival payment received from customer

Description :

1. A_P is received from customer ;

$A_P = P_F + P_R + C_{PF} + S_{PF} + C_{PR} + S_{PR} + D + C_{DF} + S_{DF}$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.

3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Case 3.4.1: The Revival amount is paid in Lumpsump :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
P_F	If PT = PLI	PFP(PDT)	A_P		RTB
P_R		PRP(PDT)			
C_{PF}		PFCGST			
S_{PF}		PFSGST			
C_{PR}		PRCGST			
S_{PR}		PRSGST			
D		PDF			
C_{DF}		PRCGST			
S_{DF}		PRSGST			
P_F	If PT = RPLI	RFP(PDT)			
P_R		RRP(PDT)			
C_{PF}		RFCGST			
S_{PF}		RFSGST			
C_{PR}		RRCGST			
S_{PR}		RRSGST			
D		RDF			
C_{DF}		RRCGST			
S_{DF}		RRSGST			

Function Terminates.

Case 3.4.1: The Revival amount is paid in installment :

Step 1: The installment amount paid by the customer A_P for revival shall be accounted as :

Receipt Side	Payment Side

Amount	Condition for Accounting Entry	Account Code	Amount	Condition for Accounting Entry	Account Code
P_F+P_R+D	If PT = PLI	PIA	A_P		RTB
C_{PF}		PFCGST			
S_{PF}		PFSGST			
C_{PR}		PRCGST			
S_{PR}		PRSGST			
C_{DF}		PRCGST			
S_{DF}		PRSGST			
P_F+P_R+D	If PT = RPLI	RIA			
C_{PF}		RFCGST			
S_{PF}		RFSGST			
C_{PR}		RRCGST			
S_{PR}		RRSGST			
C_{DF}		RRCGST			
S_{DF}		RRSGST			

Step 2 : On complete payment of the total revival amount including any extra amount arising from termination and re-requests of revival, the amount shall be accounted out from the advance head and along with the last installment amount it shall be accounted in the respective premiums and default fee heads as :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
P_F	If PT = PLI	PFP(PDT)	A_P	If PT = PLI	RTB
P_R		PRP(PDT)	P_F+P_R+D		PIA_C
C_{PF}		PFCGST	A_P	If PT = RPLI	RTB
S_{PF}		PFSGST	P_F+P_R+D		RIA_C
C_{PR}		PRCGST			
S_{PR}		PRSGST			
D		PDF			
C_{DF}		PRCGST			
S_{DF}		PRSGST			
P_F	If PT = RPLI	RFP(PDT)			
P_R		RRP(PDT)			

C_{PF}		RFCGST			
S_{PF}		RFSGST			
C_{PR}		RRCGST			
S_{PR}		RRSGST			
D		RDF			
C_{DF}		RRCGST			
S_{DF}		RRSGST			

Function Terminates

Sub Function 3.5 : Miscellaneous Receipts

Case 3.5.1 : Duplicate policy bond issuance

Description : A_P is received from customer ;

$A_P = F_{DB}$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
F_{DB}	If PT = PLI	FDPBP	A_P		RTB
F_{DB}	If PT = RPLI	FDPBR			

Function Terminates.

Case 3.5.2 : Cheque Dishounor Charges

Description : A_P is received from customer ;

$A_P = F_{CD}$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
F_{CD}	If PT = PLI	PDF	A_P		RTB
F_{CD}	If PT = RPLI	RDF			

Function Terminates.

Case 3.5.3 : Fee for Subsequent conversions (other than Reduction, Discontinuance or Commutation) in policy terms

Description : A_P is received from customer ;

$A_P = F_{CPT}$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
F_{CPT}	If PT = PLI	PCCC	A_P		RTB
F_{CPT}	If PT = RPLI	RCCC			

Function Terminates.

Function 4 : Accounting & Posting of Payments

Sub Function 4.1 : Loan Disbursements

Step 1 : Loan amount disbursed to the customer

Description :

1. A_D is disbursed to the customer ;

$A_D = L_D$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.
3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	L_D	If PT = PLI	PLD(PDT)
			L_D	If PT = RPLI	RLD(PDT)

Function Terminates.

Sub Function 4.2 : Surrender Payments

Step 1 : Surrender Value paid to the customer

Description :

1. A_D is disbursed/paid to the customer ;

$A_D = S_{VP} + B_P$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.

3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	S_{VP}	If PT = PLI	PSV(PDT)
			B_P		PBP(PDT)
			S_{VP}	If PT = RPLI	RSV(PDT)
			B_P		RBP(PDT)

Function Terminates.

Sub Function 4.3 : Medical Charges Payments

Step 1 : Medical Charges paid to the empanelled Doctor

Description : A_D is disbursed/paid to the receiver/doctor ;

$A_D = M$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	M	If PT = PLI	PMC
			M	If PT = RPLI	RMC

Function Terminates.

Sub Function 4.4 : Incentive Payments

Step 1 : Incentives paid to the Sales force i.e Direct Agents, GDS, Departmental Employees.

Description : A_D is disbursed/paid to the receiver/sales force;

$A_D = I_{SF}$

Accounting Entries :

Case 4.4.1 : Incentive Payment to Development Officers :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	I_{SF}	If PT = PLI	PIDO
			I_{SF}	If PT = RPLI	RIDO

Case 4.4.2 : Incentive Payment to Field Officers :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	I_{SF}	If PT = PLI	PIFO
			I_{SF}	If PT = RPLI	RIFO

Case 4.4.3 : Incentive Payment to Agents/BPMs/Salesforce :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	I_{SF}	If PT = PLI	PISF
			I_{SF}	If PT = RPLI	RISF

Case 4.4.4: Incentive Payment to IPOs/ASPs/SPOs/SSPOs :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	I_{SF}	If PT = PLI	PIHO

			I_{SF}	If PT = RPLI	RIHO

Function Terminates.

Sub Function 4.5 : Survival Benefit Payments

Step 1 : Survival Benefit paid to the customer

Description :

1. A_D is disbursed/paid to the customer ;

$A_D = S_{BP} + B_P$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.
3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	S_{BP}	If PT = PLI	PSBP(PDT)
			B_P		PBP(PDT)
			S_{BP}	If PT = RPLI	RSBP(PDT)
			B_P		RBP(PDT)

Function Terminates.

Sub Function 4.6 : Maturity Payments

Step 1 : Maturity value paid to the customer

Description :

1. A_D is disbursed/paid to the customer ;

$A_D = M_{BP} + B_P$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.
3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting**	**Account Code**	**Amount**	**Condition for Accounting**	**Account Code**

	Entry			Entry	
A_D		DFB	M_{BP}	If PT = PLI	PMBP(PDT)
			B_P		PBP(PDT)
			M_{BP}	If PT = RPLI	RMBP(PDT)
			B_P		RBP(PDT)

Function Terminates.

Sub Function 4.7 : Refund Payments

Case 4.7.1 : Refund for failed/non-captured/duplicate transactions

Step 1 : Refund amount accounted out from Remittance to Bank

Description :

1. A_P is the amount paid to the customer ;

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_P		SSH	A_P		RTB

Step 2 : Refund processed to the customer

Description :

4. A_D is disbursed/paid to the customer ;

$A_D = A_P$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	A_D		SSH_C

Function Terminates.

Case 4.7.2 : Jump from Function 3, Sub Function 3.1, Step 1

Step 1 : Refund amount accounted out and refund issued to customer

Description :

1. A_P is the amount received from customer ;
2. A_D is disbursed/paid to the customer ;

$A_D = A_P$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	A_P	If PT = PLI	PIA_C
			A_P	If PT = RPLI	RIA_C

Function Terminates.

Case 4.7.3 : Jump from Function 3, Sub Function 3.1, Step 2

Step 1 : Refund amount accounted out from respective heads after deduction of Medical Fees and refund issued to the customer

Description :

1. A_P is the amount received from customer ;
2. A_D is disbursed/paid to the customer ;

$A_D = A_P - M$

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
$A_D=A_P - M$		DFB	$P_F - M$	If PT = PLI	PFP(PDT)
			C_{PF}		PFCGST
			S_{PF}		PFSGST
			A_A		SSH_C
			$P_F - M$	If PT = RPLI	RFP(PDT)
			C_{PF}		RFCGST
			S_{PF}		RFSGST
			A_A		SSH_C

Function Terminates.

Sub Function 4.8 : Death Claim Payments

Step 1 : Death Claim value paid to the customer

Description :

1. A_D is disbursed/paid to the customer ;

$A_D = D_{BP} + B_P$

2. Product wise account codes as mentioned in Table 2 of "Account Codes Description" annexure for respective values of "**PDT**" shall be used for accounting.

3. Accounting shall be done for "Non-Zero" values.

Accounting Entries :

Receipt Side			Payment Side		
Amount	**Condition for Accounting Entry**	**Account Code**	**Amount**	**Condition for Accounting Entry**	**Account Code**
A_D		DFB	D_{BP}	If PT = PLI	PDCP(PDT)
			B_P		PBP(PDT)
			D_{BP}	If PT = RPLI	RDCP(PDT)
			B_P		RBP(PDT)

Function Terminates.

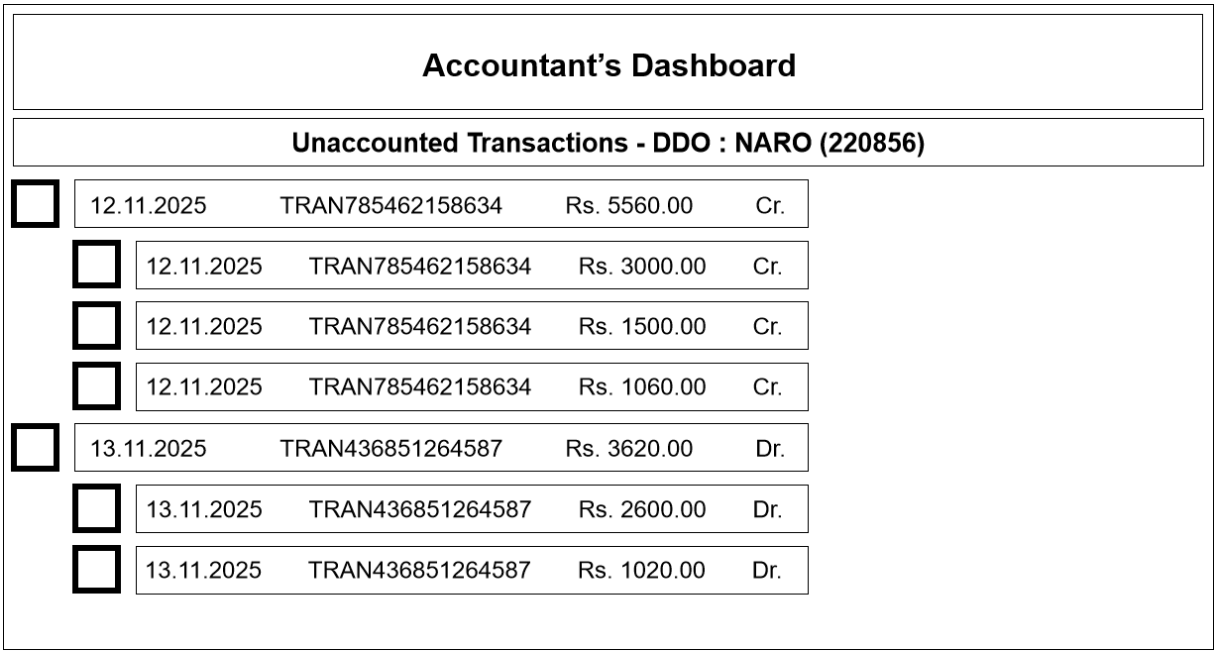
3.3 REQ-GL-1.2

Function 5 : Provision for Manual Accounting Entries in the IMS system

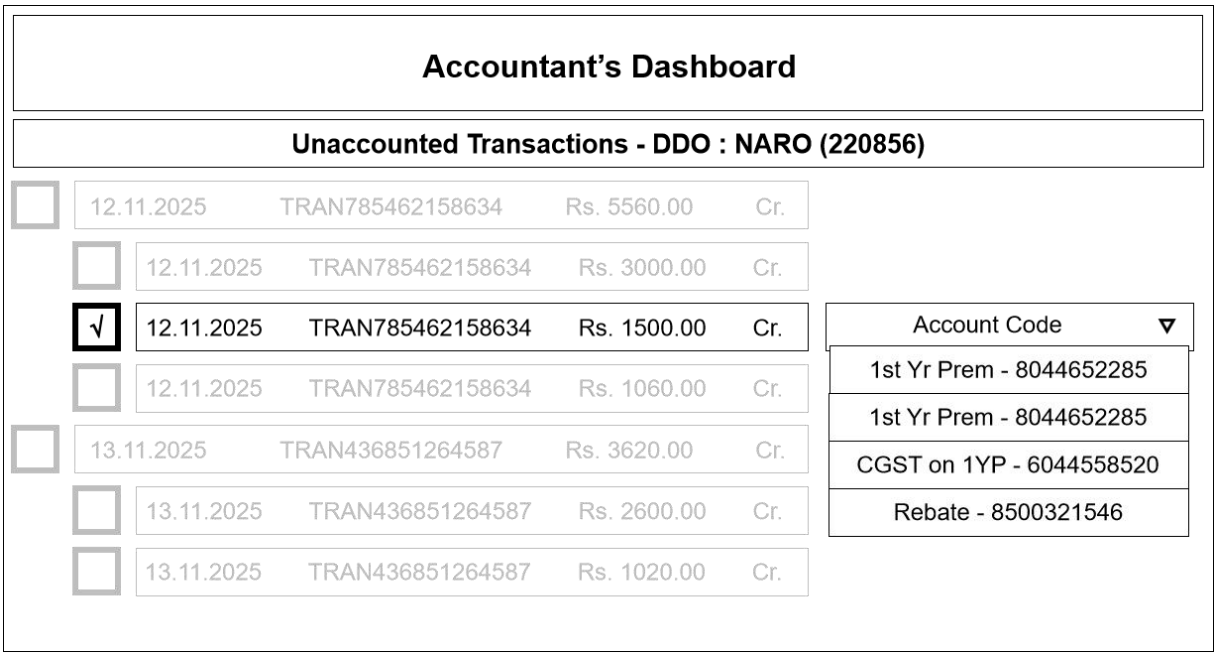
Sub Function 5.1 : Manual Accounting entries posting functionalities for unaccounted transactions.

Description : The IMS system shall provide a dashboard with provisions to manually push the accounting entries of unaccounted IMS transactions in the DoP Accounting module.

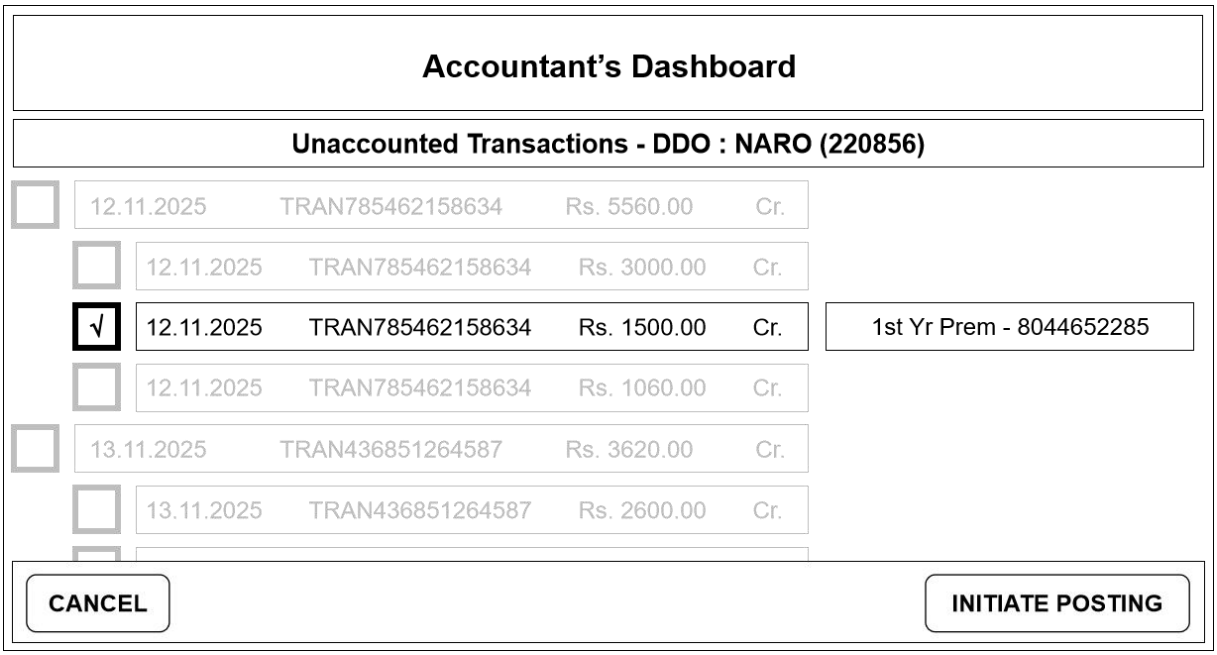
Step 1 : The IMS system shall list all the unaccounted IMS transactions with bifurcations if applicable of the respective DDO in the Accountant's dashboard of that DDO. To account a certain transaction or part transaction (bifurcated figure) manually the accountant shall select that transaction or part transaction.



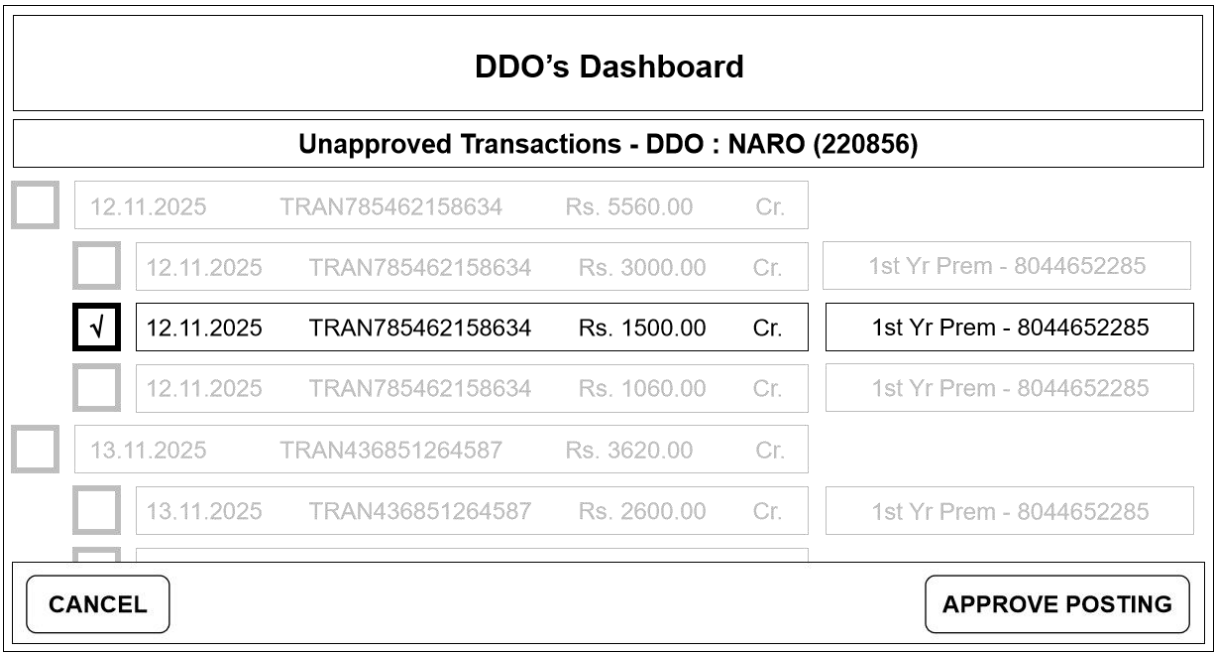
Step 2 : The Accountant shall not be able to insert any figure entry while making the accounting entry. The IMS transaction or part transaction to be accounted once selected shall show a drop down menu with the list of all either Receipt or Payment side account code depending on the nature of the transaction.



Step 3 : After selecting the applicable account code the Accountant shall click on the "Initiate Posting" button to initiate the posting of that selected transaction or part transaction.



Step 4 : On initiation of the posting for the selected transaction, the transaction shall show on the DDO dashboard for approval, once approved by the DDO on clicking the "Approve Posting" button the transaction shall be posted in the DoP Accounts Module.



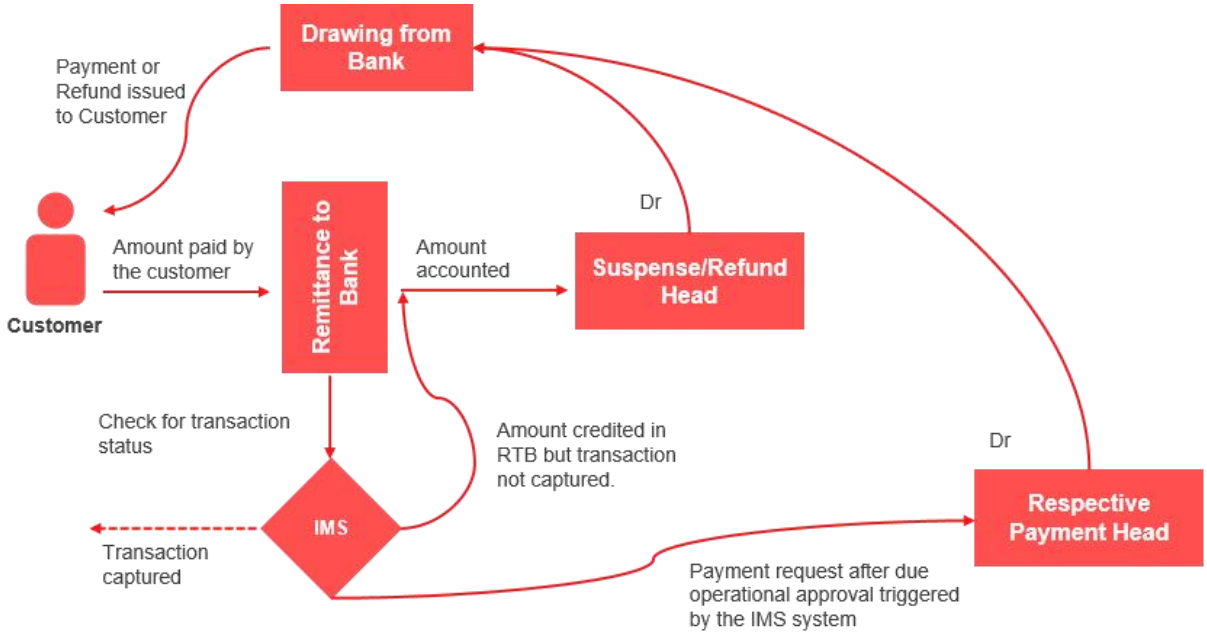
3.4 REQ-BANK-2.0

Function 6 : Automatic payments to Customers, Salesforce and Doctors

Sub Function 6.1 : Automatic Payments to the Customers

Description : The IMS system shall process automatic payments to the Customers of following amounts after due operational approvals if any needed.

1. Loan Disbursal Payments
2. Surrender Value Payments
3. Survival Benefit Payments
4. Maturity Value Payments
5. Death Claim Payment
6. Refund Payments for failed transactions



Sub Function 6.2 : Automatic Payments to the Salesforce

Description : The IMS system shall process automatic payments to the Salesforce of following amounts after due operational approvals if any needed.

1. Incentive Payments

Sub Function 6.3 : Automatic Payments to the Doctors

Description : The IMS system shall process automatic payments to the Doctors of following amounts after due operational approvals if any needed.

1. Medical Fee Payments

3.5 REQ-BANK-2.1

Function 7 : Automatic Reconciliation of Bank statements with IMS statement.

Sub Function 7.1 : Automatic Reconciliation of Remittance and Drawing Bank accounts of respective DDOs with IMS receipts and payment statement.

Description : The IMS system shall automatically reconcile the daily statements of the Remittances and Drawing bank accounts of the respective DDOs with the receipts and payment statement of IMS for that respective DDO.

Step 1 : The IMS systems fetches the Remittance and Drawing bank statements of the respective DDO and the receipts and payment statement of IMS for that respective DDO.

Step 2 : The IMS system reconciles the statements with corresponding transactions on both the statements and segregates the non-reconciled transactions in either of the statements for manual reconciliation.

Step 3 : The non-reconciled transactions shall be displayed on the respective DDOs Accountant's dashboard for manual reconciliation.

3.6 REQ-BANK-2.2

Function 8 : Provision for posting Manual Reconciliation Entries in the IMS system

Sub Function 8.1 : Manual Reconciliation entries posting functionalities for non-reconciled transactions.

Description : The IMS system shall provide a dashboard with provisions to manually push the reconciliation entries of non-reconciled IMS transactions in APT 2.0.

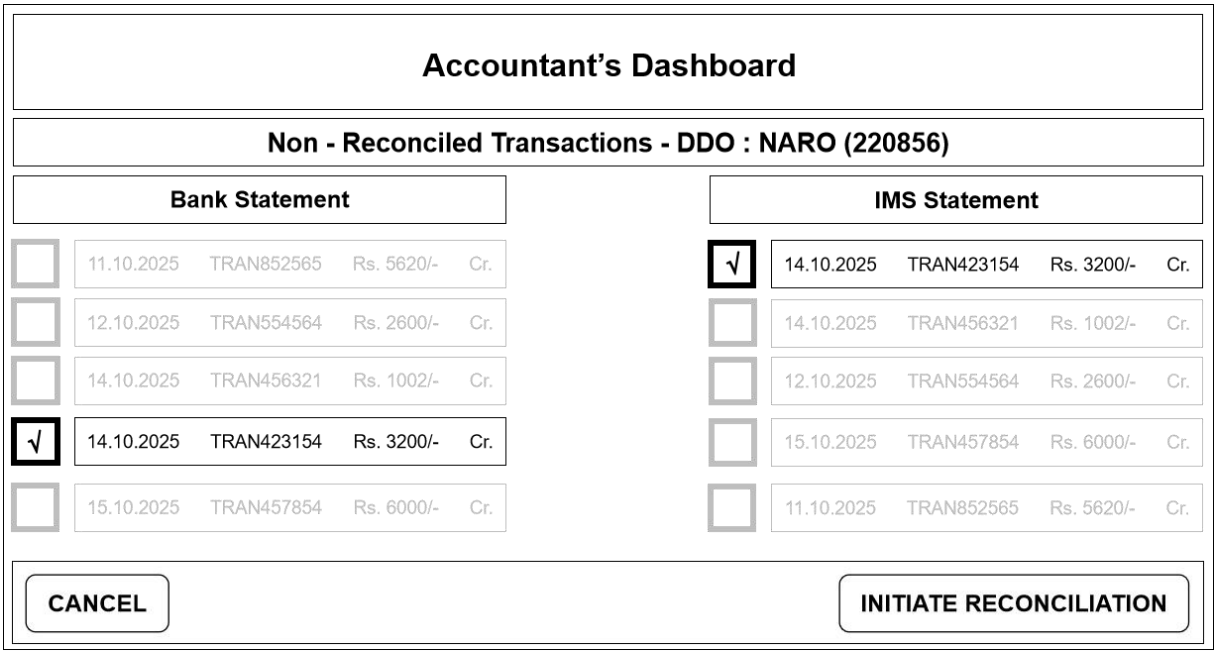
Step 1 : The IMS system shall list all the non-reconciled transactions on the Accountant's dashboard with bank statement's transaction at one side and the IMS transaction at the other side. The accountant shall be able to select corresponding transaction from both statements for performing reconciliation and no figure entries shall be permitted.

Accountant's Dashboard

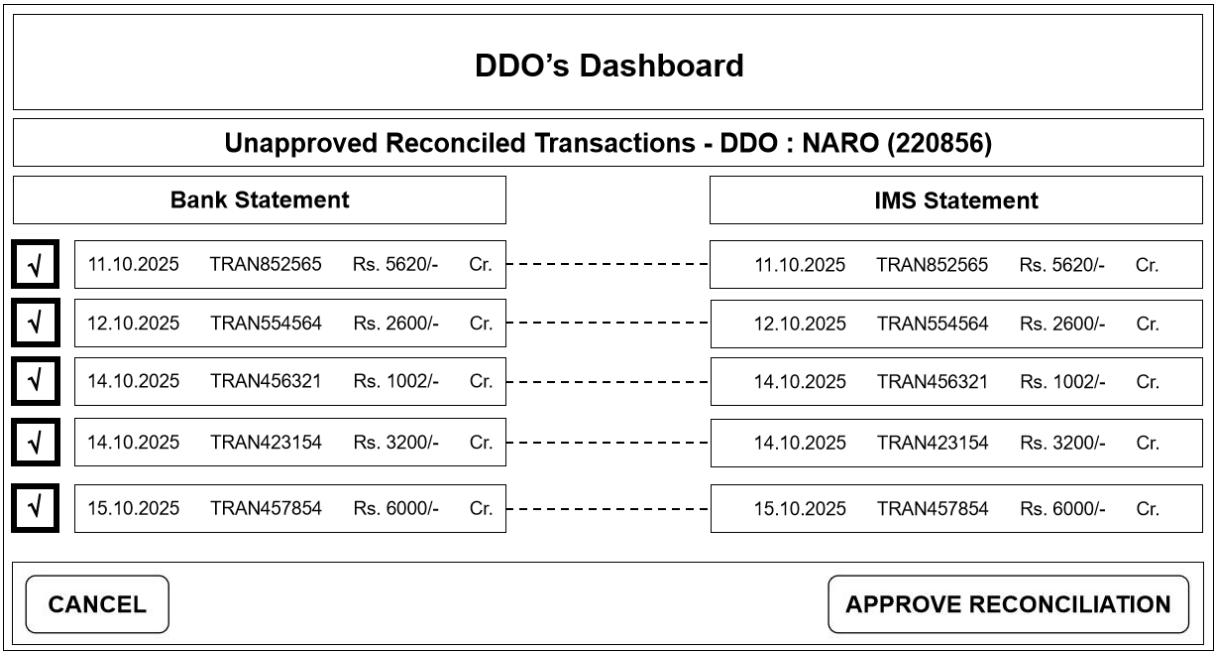
Non - Reconciled Transactions - DDO : NARO (220856)

Bank Statement				IMS Statement			
☐	11.10.2025	TRAN852565	Rs. 5620/- Cr.	☐	14.10.2025	TRAN423154	Rs. 3200/- Cr.
☐	12.10.2025	TRAN554564	Rs. 2600/- Cr.	☐	14.10.2025	TRAN456321	Rs. 1002/- Cr.
☐	14.10.2025	TRAN456321	Rs. 1002/- Cr.	☐	12.10.2025	TRAN554564	Rs. 2600/- Cr.
☐	14.10.2025	TRAN423154	Rs. 3200/- Cr.	☐	15.10.2025	TRAN457854	Rs. 6000/- Cr.
☐	15.10.2025	TRAN457854	Rs. 6000/- Cr.	☐	11.10.2025	TRAN852565	Rs. 5620/- Cr.

Step 2 : The accountant can click on the "Initiate Reconciliation" once corresponding transactions are selected from both side statements to initiate the posting of the reconciliation entries.



Step 3 : The thus initiated reconciliation entry shall be displayed on the DDOs dashboard for approval, where the entry can be approved by selecting and clicking on "Approve Reconciliation" once approved the reconciliation entry shall be posted in the system.



4. SYSTEM ARCHITECTURE

The system will be based on a micro service and client-server architecture with a modern web interface. Key components will include:

1. **Presentation Layer :** A web-based application built with a modern front-end framework.
2. **Application Layer :** A secure, scalable back-end that handles business logic and API requests.
3. **Database Layer :** A relational database to store and manage all financial data.

5. DATA REQUIREMENTS

The database must store critical financial data, including:

1. User profiles and permissions.
2. A complete chart of accounts.
3. Transaction details (date, amount, description, source etc).
4. Salesforce, Doctors and customer information.
5. Receipt and payment records.

6. ANNEXURES

This section would includes information in form of annexures which are referenced in the document.

Codes/Notations for Amounts

1. Notations

S. No.	Code/Notation	Description of Amount
1	A_P	Amount paid by the customer
2	P_F	First Year Premium
3	P_R	Renewal Year Premium
4	A_A	Amount excess to the due premium, which has to be adjusted against subsequent premiums payments.
5	M	Medical Charges
6	C_{PF}	CGST on First Year Premium
7	S_{PF}	SGST on First Year Premium
8	C_{PR}	CGST on Renewal Year Premium
9	S_{PR}	SGST on Renewal Year Premium
10	R	Rebate
11	D	Default Fee
12	C_{DF}	CGST on Default Fee
13	S_{DF}	SGST on Default Fee
14	L_P	Loan Principle Amount
15	L_I	Loan Interest Amount
16	F_{DB}	Fee for Duplicate Bond issuance
17	F_{CD}	Fee for Cheque Dishonour
18	F_{CPT}	Fee for Conversion in Policy Terms
19	L_D	Loan Amount Disbursed
20	A_D	Amount disbursed/paid to the customer/receiver
21	B_P	Bonus Payment to the Policyholder
22	S_{VP}	Surrender Value (Premiums)
23	I_{SF}	Incentive Payments to Sales Force
24	S_{BP}	Survival Benefit (Premiums)
25	M_{BP}	Maturity Benefit (Premium)
26	D_{BP}	Death Claim Benefit (Premium)

Account Codes Description

1. Non Product-wise Account Codes

S. No.	Notation	IT 2.0 Account Code	Description
1	RTB	8677000200	Remittance to Bank
2	DFB	8670000100	Drawing from Bank
3	PIA	8446015000	Initial Amount for PLI Proposal Receipts
4	PIA_C	8446015100	Initial Amount for PLI Proposal Payments/Adjustments
5	RIA	8446015200	Initial Amount for RPLI Proposal-Receipts
6	RIA_C	8446015300	Initial Amount for RPLI Proposal Payments/Adjustments
7	PMC	8016010000	PLI - Payment of Medical Charges
8	RMC	8016010300	RPLI - Payment Medical Charges
9	PFP	Product Wise	PLI - 1st Year Premium
10	RFP	Product Wise	RPLI - 1st Year Premium
11	PRP	Product Wise	PLI - Renewal Premium
12	RRP	Product Wise	RPLI - Renewal Premium
13	PR	8016008900	PLI - Rebate
14	RR	8016009500	RPLI - Rebate
15	SSH	8661004100	Settlement Suspense Head
16	SSH_C	8661004200	Settlement Suspense Head_DFC
17	PFCGST	8661001700	PLI - CGST on 1st Year Premium
18	PFSGST	8661001800	PLI - SGST on 1st Year Premium
19	RFCGST	8661002500	RPLI - CGST on 1st Year Premium
20	RFSGST	8661002600	RPLI - SGST on 1st Year Premium
21	PRCGST	8661008300	PLI - CGST on Renewal Premium
22	PRSGST	8661008400	PLI - SGST on Renewal Premium
23	RRCGST	8661009100	RPLI - CGST on Renewal Premium
24	RRSGST	8661009200	RPLI - SGST on Renewal Premium
25	PDF	8016006100	PLI - Default Fee
26	RDF	8016006500	RPLI - Default Fee

27	PLP	Product Wise	PLI - Loan Principle
28	PLI	8016000500	PLI - Loan Interest
29	RLP	Product Wise	RPLI - Loan Principle
30	RLI	8016003400	RPLI - Loan Interest
31	FDPBP	8016005900	Fee for issue of Duplicate Policy/pass books PLI
32	FDPBR	8016006300	RPLI Fee for issue of Duplicate Policy/pass books
33	PCCC	8016006000	PLI Conversion/Commutation Charges
34	RCCC	8016006400	RPLI Conversion/Commutation Charges
35	PLD	Product Wise	PLI - Loan Disbursement
36	RLD	Product Wise	RPLI - Loan Disbursement
37	PSV	Product Wise	PLI - Surrender Value Payment
38	RSV	Product Wise	RPLI - Surrender Value Payment
39	PBP	Product Wise	PLI - Bonus to Policyholders
40	RBP	Product Wise	RPLI - Bonus to Policyholders
41	PIDO	8016008600	Payment of PLI incentive to Development officers
42	PIFO	8016008700	Payment of PLI incentive/commission to field officers
43	PISF	8016008800	Payment of PLI commission to agents/BPMs/SPMs…etc
44	PIHO	8016009100	Payment of PLI Incentive to IPOs,ASPs,SPOs,SSPOs
